

# Online Learner's License Test Facility from Home #

**No need to visit the DTO office for Learner's License**

**Now the applicants with Aadhaar can take the Learner's License Test from their home.**

## Step by step process for obtaining Learner's License from Home

- Step 1** Go to <https://parivahan.gov.in/parivahan/>
- Step 2** Click on 'Online Services', select 'Driving License Related Services' and select state as 'Assam' from the drop down button. You shall see a pop up message 'Contactless License Services'. Select 'Issue of Learner's License'.
- Step 3** Read the 'Instructions for Application Submission' and click continue.
- Step 4** Select the category of vehicle and choose from the option and click on 'Submit' button.
- Step 5** Authentication with e-KYC. Select the option 'Submit via Aadhaar Authentication' and click 'Submit button'.
- Step 6** Enter your Aadhaar number and click the 'Generate OTP button'. The OTP will be sent to your Aadhaar registered mobile number. Enter the OTP and check the declaration on the page and click and then click the 'Authenticate' button.
- Step 7** After the authentication, upload signature and make the payment online.
- Step 8** **ONLINE TEST:** After the payment, you can login with application number generated and password sent to your registered mobile number. A mandatory Video tutorial will appear, and the applicant will have to watch the full video (without skipping). After that the Learner's Test will appear. The applicant can take the test at any time from any location (home or any other place).
- Step 9** **Result and downloading the Learner's License.**
  - (i)** If passed, link for Learner's License download will be sent to the registered mobile number. You can download the Learner's License from the link. Alternatively, you can also download the Learner's License from <https://parivahan.gov.in/parivahan/>
  - (ii)** If failed, you need to appear again for the Learner's License test as per rules.

# This facility is available only for those having Aadhaar number
